WELCOME TO ANB COIN

A Community-DrivenUtilityTokenonBinanceSmartChain

ANB Coin (ANB) is a blockchain-powered utility token built on the Binance Smart Chain (BEP-20), designed with a strong focus on transparency, security, long-term sustainability, and real-world utility.

This whitepaper outlines the vision, tokenomics, security framework, governance model, and growth roadmap of the ANB ecosystem. Our mission is to build a trusted, scalable, and community-driven blockchain platform that delivers value beyond speculation.

ANB Coin is a utility-focused digital asset created to support ecosystem participation, community rewards, future staking opportunities, governance mechanisms, and decentralized finance (DeFi) integrations. The project is committed to promoting responsible growth through transparent operations, sustainable tokenomics, and long-term development strategies.
With a fixed total supply of 1,000,000,000 ANB, strict vesting schedules, and controlled token distribution, ANB Coin is designed to maintain scarcity, support market stability, and encourage long-term community participation.

Our vision is to establish ANB Coin as a trusted and sustainable blockchain ecosystem that empowers users through innovation, transparency, and real utility while maintaining the highest standards of accountability and security.

ANB COIN

Executive Overview

ANBToken isapremium-grade blockchain asset built on the Binance Smart Chain

(BEP-20), designed to deliver long-term value through controlled supply, disciplined token economics, and transparent governance. The project prioritizes sustainability, security, and real utility over short-term speculation.

With a fixed total supply of 1,000,000,000 ANB , the ecosystem is protected from inflation and uncontrolled dilution. No additional tokens can be minted beyond the predefined supply, ensuring scarcity and predictable long-term economics.
ANB Token is structured with strict locking and vesting mechanisms for team, creator, and reserve allocations. These measures are implemented via smart contracts to align stakeholder incentives with the long-term success of the ecosystem and to protect market stability.

The project follows a phased development and growth model, starting with community building and presale distribution, followed by liquidity provisioning, utility deployment, and ecosystem expansion. Each phase is carefully planned to support organic growth and sustainable adoption.

ANB Token aims to serve as a utility-driven digital asset, enabling participation in staking, governance, platform services, and future decentralized finance (DeFi) integrations. Transparency is a core principle, with public wallet addresses, planned third-party audits, and clearly defined fund allocation.

Through disciplined execution, clear governance, and community participation, ANB Token seeks to establish itself as a trusted, scalable, and long-term blockchain ecosystem suitable for global users and exchange-level compliance standards.

Key Highlights

- Blockchain: Binance Smart Chain (BEP-20)
- Total Supply: 100 Million ANB (Fixed)
- Inflation: None
- TokenModel: Utility-Focused
- Locking & Vesting: Smart-Contract Based
- Transparency: Public Wallets & Audit Planned

ANB COIN

VISION & MISSION

Vision

The vision of ANB Coin is to build a globally trusted, transparent, and sustainable blockchain ecosystem that delivers long-term value and meaningful utility to its users.

ANB Coin aims to establish itself as a reliable utility-focused digital asset driven by real-world use cases, active community participation, and strong governance principles rather than short-term market speculation.

Our long-term objective is to develop a scalable ecosystem that supports innovation, promotes financial inclusion, and meets the standards expected by global users, partners, and digital asset platforms.

Mission

The mission of ANB Coin is to:

- Ensure fair and transparent token distribution to minimize market manipulation and promote equal opportunities for participants.
- Align the interests of the team, creators, and ecosystem stakeholders with the long-term growth and success of the project.
- Develop a secure, scalable, and transparent infrastructure that supports sustainable ecosystem expansion.
- Encourage community-driven growth through active participation, engagement, and governance.
- Build practical utility for ANB Coin through ecosystem services, staking opportunities, governance participation, rewards programs, and future platform integrations.
- Maintain high standards of transparency, accountability, and responsible development across all areas of the project.

ANB Coin is committed to creating a sustainable blockchain ecosystem where trust, transparency, security, and long-term value creation remain the foundation of its growth strategy.

ANB COIN

TOKEN SUPPLY & TOKENOMICS

Token Name: ANB Coin
Token Symbol: ANB
Blockchain Network: BNB Smart Chain (BEP-20)
Token Standard: BEP-20
Total Supply: 1 Billion ANB (1,000,000,000 ANB)
Supply Model: Fixed Supply
Maximum Supply: 100,000,000 ANB
Minting Function: Disabled
Inflation Rate: 0%
Contract Type: Utility Token

Token Allocation & Distribution

Allocation Category	Percentage	Tokens (ANB)
Presale	10%	10,000,000 ANB
Creator Allocation	15%	15,000,000 ANB
Management & Marketing Team	25%	25,000,000 ANB
Liquidity	25%	25,000,000 ANB
Airdrop & Community	1%	1,000,000 ANB
Locked Reserve Wallet	24%	24,000,000 ANB
Total	100%	1,000,000,000 ANB

The ANB Coin token follows a fixed-supply model designed to ensure long-term sustainability and transparency. Once the total supply has been deployed, no additional tokens can be minted. This fixed supply mechanism helps preserve scarcity, supports predictable token economics, and protects the ecosystem from inflation and uncontrolled token dilution.

ANB COIN

Tokenomics Philosophy

The tokenomics of ANB Token are designed to achieve a balanced, transparent, and sustainable ecosystem, ensuring:

- Fair and early access for initial supporters
- Long-term commitment from the team and creators
- Stable and healthy market liquidity
- Sufficient reserves for future ecosystem growth and expansion

This structure is specifically designed to prevent market manipulation, sudden token dumping, and unfair distribution advantages, while promoting long-term value creation.

PRESALE STRUCTURE

The ANB Token presale follows a multi-phase structure, designed to reward early participants while ensuring sustainable liquidity and long-term ecosystem stability.

Presale Pricing Structure

Phase	Token Price	Token
Phase 1	$0.012	5,000,000 ANB
Phase 2	$0.015	15,000,000 ANB
Phase 3	$0.018	30,000,000 ANB
Phase 4	$0.024	50,000,000 ANB

ANB COIN

The final public listing price will be determined based on market demand, liquidity conditions, and overall market environment at the time of launch.

Presale Objectives

Fundsraised during thepresalewill be allocated toward:

- Initial liquidity creation
- Platform and ecosystem development
- Smart contract security audits
- Marketing and community growth initiatives
- Operational, legal, and compliance setup

Unsold Tokens Policy

Afterthepresale concludes:

- Unsold tokens may be permanently burned, or
- Transferred to the Locked Reserve Wallet for future ecosystem use

Any decision regarding unsold tokens will be publicly disclosed with full transparency.

Binance Compliance Note

- No guaranteed returns are promised
- No price manipulation or profit claims are made
- All funds will be utilized in a transparent and accountable manner

Locking & Vesting Schedule

Purpose of Locking & Vesting

The locking and vesting mechanisms of ANB Coin are designed to promote market stability, strengthen investor confidence, and ensure the long-term commitment of all stakeholders.

These mechanisms help prevent sudden token releases, reduce excessive selling pressure, and align the interests of the team, creators, and ecosystem participants with the long-term success of the project.

All vesting schedules and locking mechanisms will be implemented through smart contracts, ensuring transparency, security, and on-chain verification.

Creator Allocation (15% – 150,000,000 ANB)

- Initial cliff period: 6 months
- Linear vesting: 24 months
- Approximately 625,000 ANB released per month

Management Team Allocation (20% – 200,000,000 ANB)

- Initial cliff period: 12 months
- • Linear vesting: 36 months
- • Approximately 694,444 ANB released per month

Locked Reserve Wallet (24% – 240,000,000 ANB)

- Fullylocked atlaunch
- Tokens reserved exclusively for:
  Ecosystem expansion
  Strategic partnerships
- Future utilities and integrations

Any unlock will require governance approval and public disclosure

Liquidity Lock

A significant portion of liquidity tokens will be locked through a trusted liquidity locking service. Lock duration and verification details will be made publicly available to strengthen investor confidence and ensure market stability.

Transparency & Security Commitment

Public wallet addresses
• Public vesting contracts
• Third-party smart contract audit
• On-chain verification of locking schedules

ANB COIN

UTILITY & USE CASES

Utility & Use Cases

ANB Token isdesigned asautility-driven digital asset with real-world and ecosystem-based

use cases. The token’s functionality focuses on long-term adoption, participation, and value creation rather than speculative trading.

Key Use Cases

1.Staking & Rewards

ANB holders can stake their tokens within the ecosystem to earn rewards. Staking helps:

- Reduce circulating
- supply Support network
- stability Encourage long-term holding

2. Governance Participation

ANB Token enables community-driven governance, allowing holders to:

- Vote on ecosystem proposals
- Participate in key decisions such as upgrades, reserve usage, and partnerships

3. Platform Payments

ANB will be used as a native payment method for:

- Platform services
- Premium features
- Future ecosystem tools

4. Community Incentives & Airdrops

ANB tokens will be used for:

- Community rewards
- Promotional campaigns
- User engagement programs

5. Future DeFi Integrations

ANB Token is designed to support future integrations such as:

- DeFi platforms
- Yield mechanisms Cross-
- platform utility expansion

ANB COIN

ROADMAP

Project Roadmap

TheANBTokenroadmapfollows a phased and milestone-based approach to ensure controlled growth, transparency, and sustainability.

Phase 1 — Foundation

- Concept development and branding
- Tokenomicsdesign
- Smart contract development
- Website planning

Phase 2 — Presale & Community Growth

- Multi-phase presale launch
- Community building and engagement
- Airdrop campaigns
- Early marketing initiatives

Phase 3 — Liquidity & Market Entry

- Initialliquidity provisioning
- Decentralized exchange (DEX) listing
- Liquidity locking mechanisms
- Market stabilization

Phase 4 — Ecosystem Expansion

- Staking platformlaunch
- Utility deployment
- Strategic partnerships
- Governance framework rollout

Phase 5 — Global Scaling

- Centralized exchange(CEX)listing applications
- Ecosystem scaling
- Governance expansion
- Long-term development and adoption

ANB COIN

SECURITY & AUDIT PLAN

Security & Audit Plan

Security andtransparencyarecore priorities of the ANB Token ecosystem. The project is designed to follow industry best practices to protect users and maintain trust.

Smart Contract Security

- Smartcontracts will bedeveloped using audited standards
- Contract logic will be immutable after deployment
- Ownership and permissions will be carefully contro**lled**

Audit Plan

Third-party security audits are planned to identify and mitigate potential vulnerabilities.
Target Audit Firms (Subject to Availability):

CertiK. **Hacken.** **SlowMist**

Audit reports will be publicly shared once completed.

Transparency Measures

Publicly verifiable wallet addresses
On-chain locking and vesting contracts
Clear disclosure of fund allocation

Risk Disclosure

Despite strong security measures, blockchain technology involves inherent risks. Users are advised to perform independent research before participating in the ANB ecosystem.
